## COMMITTEE REPORT ON PRESIDENTS DIRECTIVE

A committee composed of Dr. W.R. Dillow, Bill Enders, Murray Selby, Jim Weidhuner, and Clinton Western as Chairman, was appointed by President Street and directed to prepare information concerning VBA suitable for distribution to the members. The purpose of this directive was to provide members with a booklet or pamphlet which would give them a working knowledge of how the Association functions and also give them related information.

In the process of carrying out the President's directive, it became obvious that before accurate information could be furnished, it would be necessary to amend the Association's constitution and bylaws. Article 7 of the Constitution "Amendments", Section 1, states that: "The Constitution may be amended or repealed by a majority of mail ballot votes of members of affiliated clubs or groups, and associated members, provided the proposed changes, along with a ballot has been mailed to the aforementioned members at least 30 days prior to the final ballot date." Realizing there are members who do not have a copy of the constitution, it is printed in its

entirety in the left hand column, with proposed changes, if any, in the right hand column. The proposed changes are designed to bring the constitution up to date in line with existing conditions. For example, all references to the National Archery Association (NAA—target archery) are deleted as time has proven that this Association will afford VBA no more consideration than it would an individual club, therefore, VBA, as an Association, cannot benefit itself or the members it serves by attempting to affiliate with NAA. Under Article 4, "Government", references to "NFAA representative" should be removed because this individual is an elected officer and, as such, the words "elected officers" include the NFAA representative.

The Committee feels that all other proposed changes are self explanatory and the Committee as a whole urges and solicits a vote in favor of the constitutional amendments. Ballots should be cut out and mailed to Nancy Lee Western, Corresponding Secretary, Rt. 2, Dogwood Lane, Vinton, Va. 24179,

## Weigh your deer with a tape measure

The hunter lucky enough to kill a deer is seldom close enough to a scale to determine its weight, so he guesses at it. This can lead to some pretty wild figures.

If you carry a tape measure with you, though, this will give you a pretty good idea of your deer's true weight. Just measure around his chest, then check with the following table:

Chest Girth (inches)	Live Weight (lbs.)	Field Dressed (lbs.)
30	94	65
32	109	75
34	123	85

## DRUGGED ARROWS BANNED

by Tink Nathan

The following was taken from the Federal Register on September 4, 1974.

In July, 1974 a regulation was proposed which would restrict the type of archery equipment hunters may use on national wildlife refuges. The public was provided with a 30 day comment period and no comments were received. Accordingly 32.2 General provisions, is amended by the addition of paragraph (g) as follows

### § 32.2 General Provisions

(g) The use of any Drug on an arrow for bow hunting on national wildlife refuges is prohibited. Archers may not have arrows employing such drugs in their possession on any national wildlife refuge.

Effective date. This amendment becomes effective on Oct. 4, 1974.  
F. N. Schmidt, Deputy Director, U.S. Fish and Wildlife Service.

\*\*\*\*\*  
This represents a clear cut victory for the vast majority of American Bowhunters who wanted no part of pod arrows or drugs. Most of the drugs that could be used were illegal and were usually obtained in violation of Federal laws.

Many bowhunters organizations spoke out against the use of drugged arrows, the so called POD and the hypo-arrow. The Professional Bowhunters Society went on record against the drugged arrows at its annual meeting in 1974.

The Pope & Young Club does not recognize trophy big game taken with the use of drugged arrows.

There was considerable pressure from a small group of Fish & Wildlife officials in support of the drugged arrow, but an opinion handed down by the Solicitors (Attorneys) Office of the Interior drove home the final nail. The opinion said "The drugged arrow or pod is the illegal use of an unlicensed drug".

Hopefully hunters can now put aside this dead issue and concentrate joint efforts to combat the Anti-Hunting pressures spreading thru our elementary and secondary schools thru the efforts of the Humane Society of the U.S.

### ARCHERY'S LOSS

We are sorry to hear that Sidney Johnson of Two Rivers Archery Club, Front Royal, passed away last week.

We sure will miss Sidney at our tournaments in this area because he and his brother Sam were regular participants.

## Letter to the Editor

Dear Editor,

I read with interest the Sept. - Oct. issue of "Flight". With one exception, I thought it was a fine issue. That exception was to your article on the cover page which seemed to follow the established pattern of lauding the accomplishments of Freestyle shooters while slighting shooters of other divisions. For example, more space was devoted to Mr. Quarles than to all other shooters combined. In comparison it seems unjust to merely acknowledge the scores of Tom Frye (several times, state champion and past national champion) with a one sentence statement. Further, no mention was made at all of Webb Babcock in the Semi Restricted Bowhunter's Division. Why not? It

is a recognized division within the state you know. The point I'm trying to make is that there are Barebow, Bowhunter, and Semi-Restricted Bowhunter Champions and these individuals deserve recognition too. Naturally they aren't going to shoot the perfect scores Mr. Quarles will with all of the aids he uses, but who is to say that a 520 in Bowhunter Division, for example, isn't equivalent to a 560 in the Freestyle Division.

Perhaps the fact that it is easy to rank shooters according to the total score they shoot without regard to the aids they are permitted to use in achieving those scores contributes to our present practice of regarding the person with the highest score as the champion.

Incidentally, I agree that Mr. Quarles is a great archer.

John Stockman

## Editors Note

If you would have read the July-Aug issue of Flight you would have seen a feature article on one of our instinctive archery champions.

I'm sorry you interpreted the article as lauding the freestyle archers, this certainly was not my intention. Also, sorry that I left out Webb Babcock, our Freestyle Bowhunter Champion.

How to make  
3-D Targets

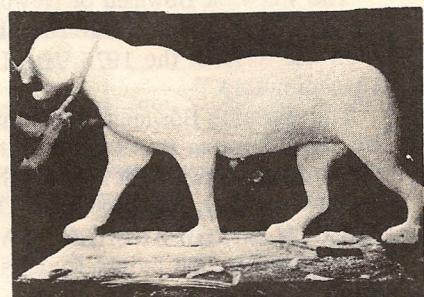

From Archery World Digest 1971

Making 3-dimension targets is a fine club project. It keeps interest up during the winter. Members compete to see who can make the most life-like target. And when summer rolls around, an invitational tournament probably can recover the cost of the materials . . . and leave enough left over for a club picnic.

Project a slide on a wall, trace the outline out of cardboard silhouette in basic shape of the animal.

Build up layers of Styrofoam cut to fit the pattern. Caulking compounds make the best glue. Insert heavy wire over the back and down the legs to reinforce the target.

Rasp smooth and cover with two foot strips of burlap, dipped in wallpaper paste. Paint in natural colors after the burlap dries. Use inner tube ears, marble eyes.
