

**MORE ON THE HANDICAP SYSTEM**

We have received enough inquiries and complaints concerning our switch to a handicap system to know there is widespread misunderstanding. We'll take another shot at explaining it and hope we can clear away some of the mysteries.

At the start, you have to tune the mind to an open channel. Hang on to your prejudices if you like, but for the moment, lay them aside. When you mention handicap to many people the immediate thought is one of bowling competition. The night some unskilled, but hot-handed, bowler used his high handicap to tear you up comes rushing back to mind and you're ready to reject the whole thing. The truth is this CAN happen in handicap archery, but not as often as you might imagine. Unfortunately, it's the rare but spectacular happening that sticks with us.

The high handicap archer does have the potential to rip the course records apart at any time, but his effort would establish new handicap records only. The handicap system allows for two basic formats for tournament competition, scratch score AND handicap score. Any Archery unit, club through national, may apply either or both formats to any event they conduct.

To men, the undeniable asset of the handicap program is its flexibility allows archery groups anywhere in the world to hold the type of shoot which suits them best. The NFAA handicap

simply gives you the scale to measure an archer's ability. If he's good, his handicap is low and if he's not good his handicap is high.

When the handicapped archer gets to your tournament, it's up to you to decide what to do with him. You can advertise that your shoot is a scratch tournament and handicaps won't be allowed. The NFAA doesn't care, but the chances are your attendance might be low. Then again, you might advertise your shoot is an all handicap affair, in which case your experts might stay home. A shoot with two main divisions is still another way to handle your tournament. Anybody who shows up with a certain handicap figure goes into scratch division and competes with actual score only while the rest go into the handicap division.

These are only several ways of handling your shoots. There are thousands of variations and only you know what suits your area the best. The NFAA wants you to be satisfied with the shoots you hold so the handicap scale does the measuring for you and you can thereupon build any kind of shoot you want.

A couple of places have written saying we've messed them up. All they wanted to do was to remain with the classified shooting they've always used. Hey! That's fine! So go ahead. Just set up a series of classes, based

*(Continued page 3, col. 3)*

**COWLES V. B. A. STATE CHAMP**

At the 22nd Annual V.B.A. State Shoot, which was held Sept. 1&2 at Augusta Archers in Staunton, Va., Mr. Warren T. Cowles, from Northern Virginia Bare Bows, took a fast lead with a 524 Field and an Aggregate of 1521, to give him his second State Championship. Mr. Cowles is the first Bare Bow Archer to shoot over 1500 in a State Championship Shoot.

All other Champion and Division winners are on pages 2,3, and 4.

**FROM THE OFFICE OF N.A.A. DIRECTOR**

Since the office of N.A.A. Director is a new one, no previous records have been kept. In order to enable me to work efficiently, please channel all correspondence to N.A.A. through this office. This is very important if we are to have any success with our association with the N.A.A.

The V.B.A. is now affiliated with N.A.A. This enables all V.B.A. members to belong to N.A.A. at a reduced rate. Dues are \$4.00 a year if sent through me; this also includes a yearly subscription to Archery World. If you already belong to the N.A.A., please let me know.

For any information concerning the JR. Olympic Program, please contact me. This is a very worthwhile program.

Tim Daley  
N.A.A. Director

on handicap numbers, and shoot away. Split out shooting styles and sexes in any manner that suits you.

I think there is a better way than we've been calling it flight competition. You start out with one flight. As people register, you'll get archers who can't keep up with the experts so you open up a second flight and put people on it with the higher handicaps setting your own break-off handicap numbers. When this second flight begins to fill up with archers who can't keep up with the best of this group, open up a third flight for the less skilled. You can carry this into as many flights as your attendance justifies, or as your trophy budget allows. Actually, this is nothing more than a type of classified shooting with some added safeguards. You are not committed to a flock of classes when the attendance is low. You can tailor the shoot, on the spot, to offer archers the closest competition possible. You can make your shoot suit your people and not be strapped to a system which only satisfies some club a thousand miles away.

Some areas have avoided a tournament category for amateurs, saying they can't afford another complete trophy set-up for a few people. Shooting by flights can solve this problem. Advertise a single flight for the amateur and stop there. You may find that in time your amateur attendance would rise to the point where several flights would be justified. Here, and in other areas of competition, the handicap system allows a club to experiment and not worry about bankruptcy if the experiment fails.

The point of this whole discussion is to help you understand that it was not our purpose to place a dirty word in the language of archery when we introduced the handicap program. It was our purpose, however, to return the tournament structure and the fun games to the people who participate. We feel the clubs and the area archers know themselves best and know what events they want to spend their leisure time on. The NFAA handicap gives you the yardstick to measure ability and the rest is up to you.
